Own the world's smallest fully-firing black-powder revolvers – in a deluxe limited edition.

The bankers and gamblers of the old west had a saying: *"An ounce of prevention may be worth a pound of cure, but 5 ounces of lead beats them both."* They favored the derringer for its vest pocket ease of carry. Now you can own – and fire – the modern version, in a deluxe .22 caliber black-powder limited edition. Your friends will admire it. You will treasure it. And it packs a wallop and shoots like a dream.

A major breakthrough. Totally unlike ordinary pepper sprays. So effective, if you use it up in a real emergency, we'll replace it for free.

Tested by the army. Stops assailants cold. A revolutionary breakthrough in self-protection.

The U.S. Army, after testing the CS ingredients in the Paralyzer, reported them *"Safer than others and more effective."* Not surprising, considering that it will render an assailant blind and helpless – from up to 10 feet away – for over 10 minutes! And now, in a major breakthrough, Paralyzer combines CS with the searing effect of 13.2% derived O.C pepper gas, for the ultimate in stopping power. One whack, and even the most rabid gorilla is a begging, crawling cry baby. While you get help or get away. So effective that if you ever use all of it in a real emergency, **the manufacturer will replace it completely free of charge!** Get two, and protect wife, girlfriend, or even adult children away at school.

Introducing the sunglasses stolen from mother nature.

Harvard ophthalmologist Dr. David Miller reported, "An eagle's eyes are so well adapted they don't see glare – they see prey a half mile away, even under reflective water."

Eagle Eyes copy these talents. Each lens captures the full spectrum of light; you see clearly, with less distortion. Glare and haze are neutralized. With zero UVA, UVB, and UVC. Your eyes relax; you see the complete rainbow of color. Ever been "eye-stabbed" by the polished bumper of the car ahead of you? Regular UV glasses don't help much. Eagle Eyes do, making driving a pleasure. Skiers, golfers, hunters, and hikers all say Eagle Eyes are the most soothing eye protection they've ever owned. Try on a pair for yourself – your eyes will thank you.

Special nickel-plated collector's edition .44 blasts like a cannon, kicks like a mule.

Fully Firing

Because of its extra-long 12" octagonal barrel, it was nicknamed the Bison. Its power and accuracy made it one of the few handguns that could drop a raging buffalo at 100 paces. Issued first to Civil War sentries and pointmen, it soon became the favorite of Southern guerilla soldiers, and marksmen on both sides of the Mason-Dixon line. Within a few years it was the most sought after gun in the west. Pick it up. Rotate the blued cylinder. Adjust the sights. Fan the hammer. Gleaming nickel-plated collector's edition also features solid walnut grips, and is ready to fire. Or display on your desk, bookcase, or mantle. An extremely impressive 18" long, like the original. We suggest you keep on its good side.

When the unit receives a radar signal, it mixes the signal with an FM chirp, streaking it back, confusing the radar gun's computer. Long range gives you time to correct your speed. No tickets, no hassles, and your car insurance might get cheaper, too.

Laboratory and road tested. Tested by the University of Denver. The results: **so effective that if you get a ticket in the first year you use one, the manufacturer will refund your fine!**

Installation is a breeze. Windshield mounts, adapters, and power-cords are included. Test button lets you check working-status anytime. Combine with your radar detector for complete coverage. And drive with the full freedom of the open road.

World's first radar detector and laser/radar scrambler all in one! Renders your car *invisible*.

You can't catch what you can't see!

Newest detection/scrambling power makes speed-trap equipment near obsolete! Tests at the University of Denver proved it: the Phantom not only alerts you to radar up to 4 miles out, it turns the signal to useless trash! Lasers? Phantom *constantly* transmits I.R. beams to eliminate your image. They can hunt you by car, speed-trap, even helicopter, but you're simply not there.

Because Phantom is a passive system, it's completely legal! Built-in diagnostics check every function. Indicators tells you type and range of police equipment. Adjust for dark, mute, city/hwy, and sensitivity. Manual jammer test button. X,K,Ka, and VG-2 protection. Complete with warranty, windshield mount and power cord. So effective, if you ever get a ticket the manufacturer will pay it for you!

Mounts easily over front or rear plate. Get two for even better protection. Use with your radar detector for complete coverage.

Own the slipperiest electronic driving protection speed patrols have *never* seen! The futuristic Cosmo 1000 not only provides instant radar/laser protection, it renders you invisible to the new VG-2 "gotcha" patrols. As you know, police love to pull over drivers with radar detectors. And with the new VG-2 guns installed in their patrol cars, they zero right in on the emissions of plain old-fashioned radar detectors. But because the C-1000 has zero emissions, it's invisible!

Approaching a speed trap, the C-1000 locks on to X, K, superwide Ka, and laser probes, gives you an instant early warning. 4 visual and 4 audible alerts identify beam types, location, and closing speed! 5 segment meter monitors level. Select the sensitivity (City, Highway, Super) with a click of the easy-to-use controls, including one-touch Dim/Dark/Normal and muting. The best protection you'll ever own – super sensitive early warning plus 100% cloaking of your equipment. Complete with all easy mounting gear and instructions.

Awesome Blades

THAT WILL LAST YOU A LIFETIME. GUARANTEED.

Hollow-grinding imparts the professionals *concave* razor edge.

New knife sharpener automatically positions your blade for the perfect edge.

If you're like most of us here, sharpening a knife with a stone is easier said than done. The angle has to be just right, or you end up worse off then you started. The new Diamond Electric Firestone solves all that. Plug one in and try it. We did, and promptly threw away our old stones. Firestone's four *counter-rotating* wheels are perfectly angled for a hair-splitting *hollow-ground* edge every time – just like the pro's do it. From Bowie blades to battle-axes, Buck knives to butcher steel. There *is* one drawback: all your friends will want you to tune up *their* knives, too! MURAKUMO Swords

Pure White Maple

In the seventeenth century, Munenori, the legendary swordsman and military advisor to the shogun, wrote his famous treatise The Sword and The Mind. *"As clouds move in the sky, so must the warrior, unanchored to any one desire or place..."* The White Maple Murakumo (Japanese for Rising Cloud) Swords inherit his knowledge. No bells, no whistles. Just rock hard scabbards and grain-matched grips, light enough for overland travel. Frosted 440 stainless blades, sharper than an emperor's glare. Ancient symbols translate to "Use bravery wisely, and your sword as well." Striking works of art and power.

Own the earliest American knives ever made.

Our obsidian factory, c.10,000,000 B.C.

When the first Americans crossed the land bridge from Siberia, they found a land teeming with strange animals. Great toothed cats. Monstrous hairy elephants. Elk the size of small hills. And they found the weapon they'd conquer them with: pure volcanic obsidian. Forged in the very furnaces of the earth itself. Capable of a scalpel edge previously unattainable. Lashed to horn, it would skin a mammoth. Now own one. Handmade. Grips of genuine antler tine. In your collection or carving a continent.

Pewter-finished talons, wings, and heads. Rising above grips of scaled black resin. Stainless blades polished to a feral gleam. Unlike imitations, these are the originals, complete with certificate of authenticity. Each represents the finest swordcraft you will ever own.

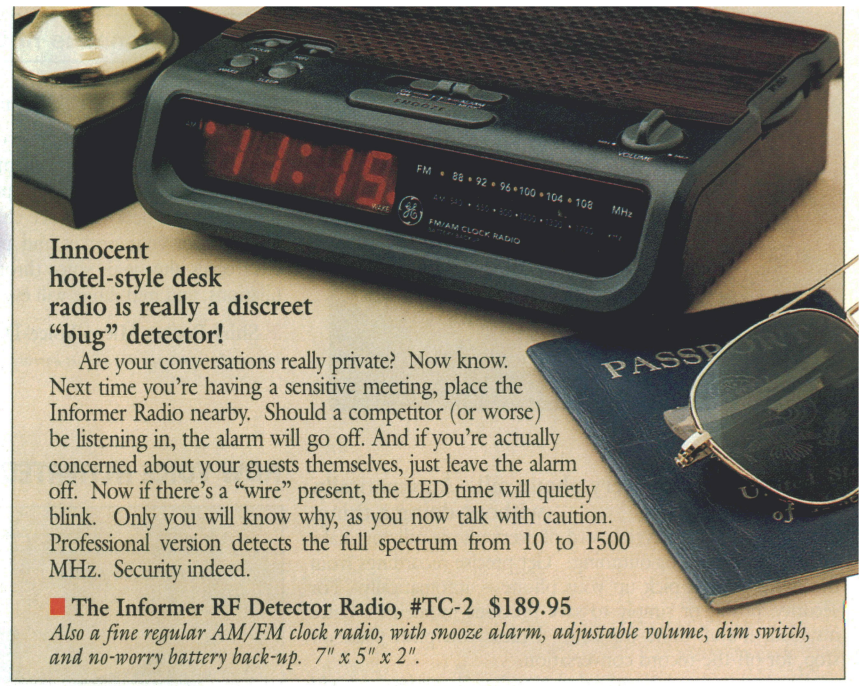
Newest phone voice changer also gives you push-button special effects!

It's great to get a call, and pretend it's not you that answered. Bill collectors get riled. Friends get confused. Even be your own secretary, or let a woman home alone discourage harassing calls by pretending to be a man. Plus, push a button and choose 10 different sound effects! Say you're on a call you'd like to get rid of. One of those pesky long distance sales geeks for instance. Touch the button, and, whoops, there's the doorbell, so sorry, got to go now! Or hit the scream key, and tell them how you really feel. Or sirens, drum beats, and more. Convince people you're on the street, at a show, or out in the jungle. Hear good news? Press the applause button! Clicks to your phone in seconds, and like us, you'll be surprised how much of a blast it is. Spices up your answering machine, too!

■ **Phone-Fun Special Effects and Voice Changer #M2200** ~~$44.95~~
Your price $39.95



Innocent hotel-style desk radio is really a discreet "bug" detector!

Are your conversations really private? Now know. Next time you're having a sensitive meeting, place the Informer Radio nearby. Should a competitor (or worse) be listening in, the alarm will go off. And if you're actually concerned about your guests themselves, just leave the alarm off. Now if there's a "wire" present, the LED time will quietly blink. Only you will know why, as you now talk with caution. Professional version detects the full spectrum from 10 to 1500 MHz. Security indeed.

■ **The Informer RF Detector Radio, #TC-2 $189.95**
Also a fine regular AM/FM clock radio, with snooze alarm, adjustable volume, dim switch, and no-worry battery back-up. 7" x 5" x 2".

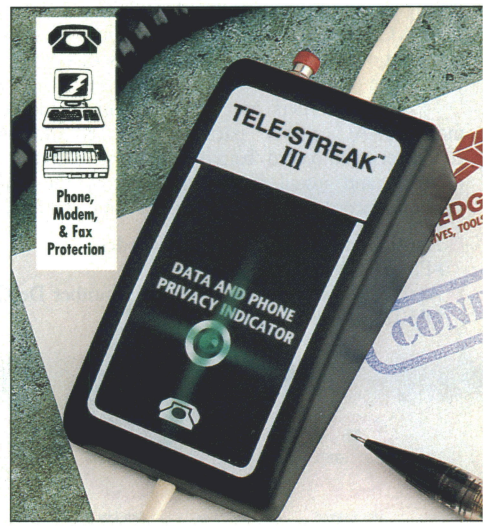
Voice Security

MORE ON NEXT PAGE, TOO.

New Tele-Streak keeps your calls private. And more.

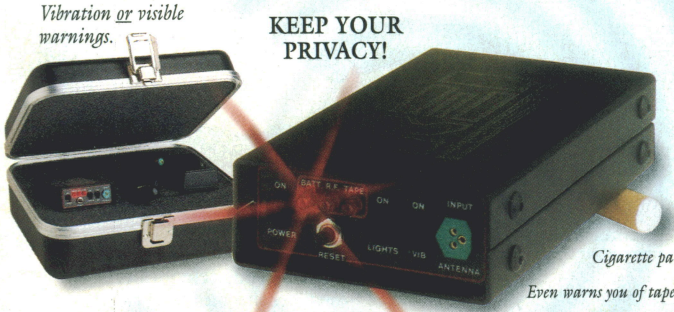
If during a phone conversation the green light goes out, someone has activated a tap or picked up an extension. Press the red button to resume talking, now with caution. When Tele-Streak is installed on all your extensions, the extension you pick up *automatically disconnects the others!* No more running to turn off the answering machine. LED also tells you – before you pick up – if the line is in use. Like a mini phone system, protecting your faxes or modems from interruption, saving you steps, and insuring your privacy. Measures just 3½" x 2" x 1" and requires no batteries.

■ **Tele-Streak Tap Detector & Privacy Module #TRK-1000 $39.95**



Vibration or visible warnings.

KEEP YOUR PRIVACY!



Cigarette pack miniaturization.

Even warns you of tape recorders or video!

Newest detector not only warns you of transmitters, but tape recorders, too!

Now you can secure your business transactions or meetings. TRD is the most sensitive device used by int'l operatives. Completely undetectable. Switch it on. Instantly you are surrounded by an invisible wall of protection. Only the TRD detects the faintest RF signals from a bug, *plus* the motor or EMF signals of a tape or video recorder! Use the sleeve antenna and sweep entire rooms without anyone knowing it. LED's identify the type of surveillance directed at you. Secrecy is vital? Lights switch off and a silent vibration alerts you. Only *you* know the snoopers are nailed. Unlike other detectors, visual checking isn't needed. Permanent rechargeable ni-cad batteries are built right in. LED warns when recharge is needed. The most secure privacy protection you can buy. Deluxe hard-shell travel case.

■ **The TRD Personal Surveillance Detector, #TRD-800 $599.00**

Secure your privacy instantly.

Now own one of the intelligence industry's secret weapons, and find out if *your* conversations are being monitored by hidden microphones. Developed by counter-surveillance experts, the CSI-1 instantly warns you of electronic eavesdropping – in rooms, vehicles, or even on the person you're talking to. An alarm sounds, and the glowing LED pinpoints any bug's location. Requires 3v batteries. Lifetime warranty.

■ **Pocket Bug Detector #CSI-1 $149.95**

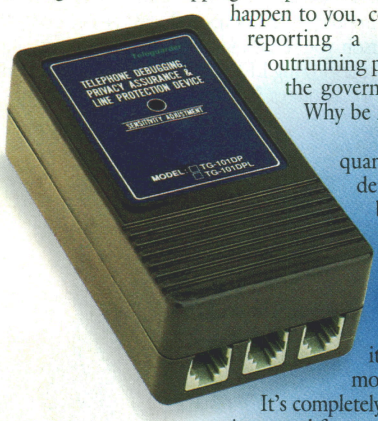
THE PHONE ZONE

Tele-Guarder not only tells you when your calls are monitored – it jams the listening device, too! Stops recorders cold!

It happens every day. Competitors listening in on business calls. Investigators eavesdropping on personal calls. Before you say it couldn't happen to you, consider this: private detectives are reporting a banner year. Technology is outrunning privacy at an astonishing rate. Even the government can legally tap your phone. Why be next?



The new Teleguarder takes a quantum leap beyond ordinary tap detectors. It not only alerts you to bugs, it actually jams them to oblivion! For instance, if an automatic machine is taping your calls, Teleguarder turns it off. Bugs, taps, even extensions are rendered inoperable. Even better, it installs in seconds. Click in the modular connectors and then ignore it. It's completely automatic, insuring that your calls are private, and frustrating all would-be listeners.

In this day and age of lawsuits, and competitive business, why take chances? Teleguarder costs you far less than the price of being overheard.

■ **Teleguarder Privacy Controller #CL-208 $119.95**

Re-capture your stolen privacy. Call with confidence and security.

Every time you make a call, are you giving out your name and phone number to millions of strangers and organizations that use Caller I.D? Automatic Caller I.D. Blocker gives you back your privacy. No need to dial special codes or services. Once installed it does the rest. Get two, one for your home or office, and one for a special friend's house.

Prompt repeats and if no code is entered, caller is automatically disconnected! Use the key-pad to change the code, or de-activate unit. It's like an un-listed phone number when *you* want it to be. Study, meal-time, romantic evenings, or when you want calls only from those you gave your password to. Also secures fax and modem lines!

POWERFUL SECURITY

Please Read!

The best thing about stun units is just that. They only stun. Studies conducted across the country, have concluded that they are a non-lethal alternative to handguns. No irrevocable mistakes, no child tragedies, no permanent effects. Just tough, humane protection.

The crackling blue plasma spark alone will send most thugs fleeing. Yet with just a 3 to 5 second trigger pull, most any assailant is down and immobile for up to 5 to 10 minutes. While you get help. Studies show that Stun Guns cause no permanent damage, even to those with heart conditions, and cannot shock the user through the assailant. You enjoy the full power and self-confidence that only comes from responsible self defense.

Please check your laws before ordering. Not for sale or use in Stanford CT, Hartford CT, Washington DC, Chicago IL, MA, MD, NY, NJ, HI, NE, MI, RI & WI.

Book learning.

Chased out of Mexico for cattle rustling, rogue wanderer Roy Bean settled in 1882 at the Texas camp of Vinegaroon – which he promptly renamed Langtry, in honor of an English actress. He then appointed himself Justice of the Peace – why not – and began dispensing Texas justice with a law book and a six-shooter. As the self-proclaimed "Law West of The Pecos", Judge Bean once said "Men respect books – especially when walloped over the head with them."

The Judge may have had something there – and we're pleased to follow his way of thinking. Faithful to the 1882 original, our fully-firing .31 caliber Derringer packs a mule-kick, black-powder wallop indeed. Best of all, it comes to you concealed in the velvet-lined pages of its own hard-bound book – a twist the Judge would be proud of. Add one to your library today.

Derringer fires a lead ball at over six-hundred feet per second.

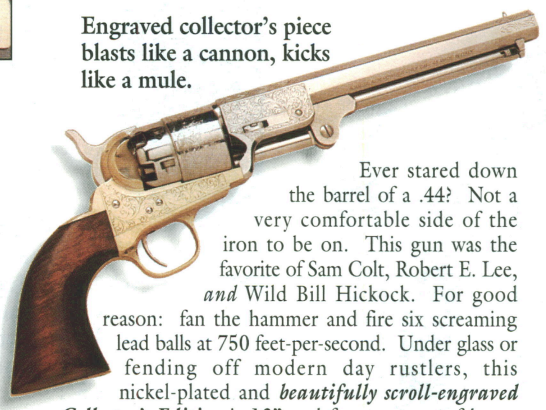
Engraved collector's piece blasts like a cannon, kicks like a mule.



Ever stared down the barrel of a .44? Not a very comfortable side of the iron to be on. This gun was the favorite of Sam Colt, Robert E. Lee, *and* Wild Bill Hickock. For good reason: fan the hammer and fire six screaming lead balls at 750 feet-per-second. Under glass or fending off modern day rustlers, this nickel-plated and ***beautifully scroll-engraved Collector's Edition*** is 13" and forty ounces of brass, walnut, and case hardened steel. Stay on its good side.

You may have lived through it. A time of courage, a time of confusion. Of promises broken, and hearts, too. On both sides of the ocean. Even today, the wounds have not fully healed. Yet the courage of the men who fought it – struggling with both doubt and the enemy – cannot be denied. Now own the steel that tipped their M16 rifles, a chilling reminder that this was a jungle war, often fought close.

The Steel of Legend

The Warlord Sword

It was an astonishing find. A lifesize clay army – 6,000 strong – unearthed in rural China. Commanded by a warlord who in real-life built a 10,000 room palace – where he rested but once between conquests. His sword was over 32" long. Stags clash in mortal combat on the etched – and ferociously sharp – 25" blade. Mirror-finished steel grip is bamboo-styled and topped with a gleaming – and probably once crushing – steel ball. Now yours, complete with black scabbard. A remarkable collector's piece.
